During the past eight years the public have carefully observed the wonderful cures accomplished by Allen's Strengthening Cordial. From its use many an afflicted sufferer has been restored to perfect health after having expended a small fortune in procuring medical advice and obtaining poissonous mineral medicines.

Its medical properties are alterative, tonic, solvent and diuretic. There is no disease of the human system for which Allen's Strengthening Cordial cannot be used with perfect safety. Allen's Strengthening

Although farther from the periodically lets loose on India. south pole than any part of England is from the north pole, the weather was nearly always stormy, and the tempera-

ture verging on the freezing-point, even in the summer of that hemisphere. Astronomers are considering of appeal ing to the Southern ocean again five years hence, when another transit of Venus will take place, and when still more advantage is expected to be derived from the use of a situation as near the antarctic pole as possible. In order to give these hard-working astronomers fair play, it would be no more than right to send out an expedition a year or two in advance to accumulate as many useful and geographical facts as might be attainable; and it is just possible that, in so doing, Sir James Ross' seventy-eighth degree of latitude might be overpassed especially as they might now have, what Ross had not, steam power wherewith to contend alike against calms and adverse

What we know of the south pole, then, is simply this-that nobody has got within seven or eight hundred miles of it; that icy barriers are met with quite eclipsing anything known in the north frigid one; that mountains have been seen (one shooting forth volcanic flames) lof-tier than any discovered by our northern explorers; that all the land is covered with snow at all seasons; that no human being has been met with beyond fifty-six growth, except lichens, has been seen beyond fifty-eight degrees of latitude: and he worked as porter in a dry goods house, that no land quadruped is known to exist beyony sixty-six degrees of latitude. with it, and he could find nothing re-

One object of Sir James Ross expection not only because much of its soil cannot be made profitable by the rude appliances of native husbandry, but also because it is badly supplied with railways, or even roads; and above all, because no or even roads; and above all, because no or even roads; and above all, because no or even roads; vast amount of unemployed labor to pertime of scarcity. The value of such a jars, says one who has tried it, is to tie a The reader will remember that two system may be estimated from a single string wet with kerosene around the years ago the astronomers of the whole fact which Dr. Hunter mentions in his barrel, can or jar. Repeat the wetting which would, it was believed, afford data to irrigate 100,000 acres, and thus to for calculating the true distance of the raise 750,000 hundred weight of rice. sun from the earth, and from all the During the famine of 1866 all the reother planets. It was desirable to make sources of the government were unable, the observations at many different spots, as we have said, to provide the people widely separated both in latitude and in with more than 175,060 hundred weight. longitude; and one of the spots selected Had the canal existed in the time of the morning to the man who has been at was Kerguelen's island, already men- famine it might have saved two or three the centennial.

Good Hope and Australia, but farther If the natives had the energy of Eurosouth than either. Astronomers from peans, they would go long distances and England, Germany and the United States landed on the island and did good work there, but (and this is the reason why we mention the matter here) the for life when stricken down by those terroughness of the climate was a great trial rible agencies of destruction which nature fection to the pea.

A Laughing Philosopher.

The career of the "Industrial friendly inn and Free Evangelist home," of St Louis, is thus described by a reporter of the Globe-Democrat : In the cook-room, handling the pans and pots, the reporter | Billings. found a man who might appropriately be called the "laughing philosopher," so merrily did he hum a tune to himself and so heartily did he laugh during a conversation with another workman. He had a curious history. He had travelled the world over. He had crossed the Atlantic sixty-eight times and the Pacific four times. He had been on one expedition to the north pole, had farmed on the Nile and raised horses in Arabia. He was a printer, and had made the first English print in Constantinople. He was a telegraph operator, and had sent the first despatch over the first wire that went out from Cairo. He had hunted printer and telegrapher, but sailor, soldier, had also travelled with a magic-lantern show, and in a conversation with the reporter claimed to have been in London with Artemus Ward, and assisted him in manipulating his magic show. Two winters ago he arrived in St. Louis, and since then had learned the trade of a moulder and worked at it six months degrees of latitude ; that no vegetable ago. Subsequently he worked in a photograph establishment, and says he could easily take pictures. Last summer

munerative to do. When the Industrial

Inn was opened he went there, and will
